

Daffodil International University

Department of CSE

Course Code: MAT211

set:B

Section: 65_C

Course Title: Engineering Mathematics

Quiz: 01

Time: 30 Mins

01. Give the answer (with explanation) to the following questions

4

a) Mention the order and degree of $\frac{d^3y}{dy^3} = \sqrt[4]{\left(\frac{d^2y}{dy^2}\right)^3 - 5xy}$

b) Write down the conditions of Linear equation with example

02. Find the differential equation of the solution $y = ae^{-3x} + be^{2x} + ce^x$

6

03. Solve the equation $(x - 1)(y + 1)dy - x(2y + 1) dx = 0$

5
